Last Minute News from the Departments

S. S. I. E.

The Student Society of Industrial Engineers held their annual picnic Thursday afternoon, May 23, at Griggs dam. After a little excitement and dashing about in finding the right dam, the roll call was responded to by forty-seven stags and one couple.

The big event of the day was the part-time ball game between the juniors and seniors. The natural topography of the diamond presented some difficulty especially to the outfielders, who careened about over stumps and boulders on an angle of about ten minutes past eight. But this condition of the field proved of little consequence as the ball seldom left the infield. This may or may not be attributed to the pitching skill of Messrs. Kranhold and Darragh.

The "Ally Umps," Professors Younger and Schneider, came in for plenty of sideline heckling. They were accused by both sides of intimidation. "Multiple-cut Pete" Morrison had an easy job as score keeper. Messrs. Kohr, Sommerschild, and the Phi Gam monkey arrived during the fourth inning. It was in the hectic fifth inning that the cry of "Come and get it" broke up ball game.

The dinner was set up in cafeteria style, and the menu was excellent, thanks to Paul Grady. During the repast there developed quite a rumpus between Karl Culler and the monkey, but as it was a family affair nothing could be done about it.

Following dinner came amateur hour, which brought out much potential talent. The winner, Miss Irwin (the only girl I. E.) will appear at the Roxy in the near future.

With one omission the whole picnic was a "howling success." The omission, that of the S.S.I.E. song, may or may not have been unfortunate. —*Dwight Crummer.*

The student branch of the American Society of Civil Engineers held a dinner meeting in the form of a Farewell party for the seniors, at the Pomerene Refectory on Tuesday, May 28. Mr. T. T. Knappen, designing engineer for the Muskingum Conservancy Project, was the principal speaker of the evening. In the course of his talk he outlined the possible fields open to graduates, and emphasized that routine and unpleasant jobs are the stepping stones to higher things to come. New men, he said, must go through this test period in much the same manner that we in college study the "dry" fundamentals.

Professor C. E. Sherman, an old favorite with fans of after dinner speaking, proved even more popular than usual, with his sly stories and dry wit.

In closing, the faculty individually congratulated the seniors on the completion of their courses. And in response, the graduating group voted unanimously a rising vote of appreciation of the faculty.

This meeting brought to a close another successful season for this Student Branch. The program has been a diversified one. There has been a great deal of activity and enthusiasm shown by the members as a group. And with equal support next year from the student body we hope to do even better.
